Allowable Subject Matter

Claims 8-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a method of assaying comprising producing an image of a light beam diffused by a sample, wherein said image comprises, among other zones, a meniscus zone, examining the spatial structure of the image and distribution of light energy in the image with respect to a reference, and measuring noises which are created by the sample. The prior art teaches away from producing an image of the meniscus zone, as such a method would include noise from the meniscus zone, while Applicant's method includes noise reduction but includes an image of the meniscus zone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Modlin et al., 6,071,748, teaches measuring a volume away from the meniscus to avoid noise. Kraft et al. 4,488,812, teaches covering the upper portion of a container to avoid errors due to meniscus reflection and scattering.
